Subject: Re: A call from Harris County

Thank you.

By the way, if we are not providing adequate feedback to your emails, I apologize. Things are coming fast. I will work on improving that.

I got a call from Harris County. She was referred to the Hotline by Region 2, one of Eric Mosher's people. She was looking for details about EPA and HHW. Her boss told her to research it to find out how to make sure the the Feds respond to requests from the counties. I just spoke from FEMA's Mission Assignment Policy Handbook. She indicated that it was her boss/office was the ones to make the plea for help.

Bottom line is that she gave me all indications that Harris County will seek help with HHW, possibly white goods and e-goods through the State.

Just a heads up, I need no reply.
